

Current Situation:

Puerto Rico Government is responding to an outbreak of a respiratory illness caused by a novel (new) coronavirus. The outbreak first started in Wuhan, China, but cases have been identified in a growing number of other locations internationally. The WHO declared a COVID-19 pandemic on March 11, 2020. The first case of COVID-19 in Puerto Rico was notified on March 13, 2020. Puerto Rico Governor declared a state of emergency and activated the National Guard. On May 21, 2020 the Governor issued Executive Order 2020-041 stating an extension to the lockdown and curfew until June 15, 2020. The curfew decreed by the Governor stays from 1900 to 0500. Some outdoor physical activities are allowed. The new Executive Order establishes the opening of several commercial sectors as of Tuesday, May 26, such as: Restaurants, barbershops, beauty salons, car dealers and shopping centers, among others. All businesses have to comply with protection measures and respect the maximum capacity of customers established in each case.

HOSPITAL SURGE CAPACITY Source: Puerto Rico Department of Health (As of 5/27/2020)

This report includes data based on the information provided by hospitals in Puerto Rico. The data does not include rehabilitation, correctional and psychiatric hospitals; VA Caribbean Healthcare System; and, Vieques and Culebra municipalities' health centers. The numbers related to COVID-19 occupied and/or in use ICU beds and ventilators are already included in the total occupied (these are not additional numbers). The information regarding census and availability is based on active beds at each hospital. These beds are reported by hospitals based on the available equipment and personnel to manage these operations. These numbers can change daily based on the hospital decisions and available resources.
