Key Points:

1. Data continues to show better percentage (%) rate of positives in PR vs. US when compared with total testing.
2. **Negative Trends:** Curve of % Positives from Testing in US continues on the rise. PR Accumulation Rate throughout 4-11-2020 continued to grow through 4-11-2020
3. **Positive Trends:** % Positives vs Testing in PR trend was slightly decreasing. Only 171 positive results during last five days.
4. Still, testing capacity in PR is low when compared to other US jurisdictions
5. Last five days PR total Accumulation Rate is 34.2/day. If this rate continues during next two days, PR positives cases might be decreasing.
